

THEFT SENTINEL — ROLE DEFINITIONS & PERMISSION MATRIX

Official System Documentation

1. Administrator (Admin)

Role Overview

The Administrator is the highest-privileged user responsible for configuring the system, managing all personnel profiles, overseeing camera infrastructure, and maintaining system-wide operations.

Permissions

Account & Profile Management

- Create new user profiles (Admin, Security In-Charge, Security Guard)
- Edit user profiles
- Delete user profiles
- Assign roles & permissions
- Change **any user's** password
- Change their own password

Camera Management

- Add new cameras
- Edit existing camera details
- Delete cameras
- View all real-time camera feeds

Alert Management

- View real-time alerts
- View alert history
- Delete alerts

Feedback Management

- View all feedback submissions
- Delete feedback entries

Report Management

- Generate manual reports
- View automatic reports
- View previously generated reports
- Delete reports

Access Level

- **Full System Access (CRUD on all modules)**
 - **Top-level authority over all configurations**
-

2. Security In-Charge (Supervisor / Control Room Officer)

Role Overview

Responsible for daily monitoring of surveillance operations, responding to system alerts, and documenting incidents. Does not manage system-level configurations.

Permissions

Account & Password

- **Can only change their own password**
- Cannot change other users' passwords
- Cannot create, edit, or delete any user profile

Camera Monitoring

- View real-time camera feeds
- Cannot add cameras
- Cannot edit cameras
- Cannot delete cameras

Alert Handling

- Receive real-time alerts
- View alert history
- Cannot delete alerts

Report Handling

- Generate manual reports
- View automatic reports
- View historical reports
- Cannot edit reports

- Cannot delete reports

Access Level

- **Operational access only**
 - **Write permissions limited to report creation**
 - **Read-only permissions on past data**
-

3. Security Guard (Field Guard / On-Ground Personnel)

Role Overview

Acts as the frontline responder to alerts and provides feedback on detected incidents. Has minimal system privileges.

Permissions

Account & Password

- **Can only change their own password**
- Cannot change other users' passwords
- Cannot access any user management module

Camera Monitoring

- View real-time camera feeds only

Alert Interaction

- Receive real-time alerts
- Cannot view alert history
- Cannot delete alerts

Feedback Submission

- Provide incident feedback (Correct Detection / Incorrect Detection)
- Add optional notes explaining incorrect detections
- Cannot edit or delete feedback once submitted

Access Level

- **Minimal permissions**
- **Feedback-only write access**

4. Password Permission Summary Table

Role	Change Own Password	Change Others' Passwords
